1962 INTRODUCTION

MILLBANK 414 (Mid-Season Bloomer)

We have grown this variety for the past five years and under just about every condition one could run into. We believe MILLBANK will measure up to all the requirements necessary to obtain desired results. MILLBANK will grow to over five feet, 18-22 bud spike--will open 7-9 on a 26-28 inch flower head. Tall upright foliage, and very healthy. Heavy producer of bulblets which germinate readily. An excellent cut flower variety with a nice medium sized, whippy stem.

1961 INTRODUCTIONS

MICHAEL ANN 442 (Mid-Season Bloomer)

Rose pink . . . white midrib . . . primrose yellow deep in throat MICHAEL ANN will grow to an easy 5 feet in height with 22 bud spike, opening up to 8 slightly ruffled florets. Some growers have commented, "very similar to Friendship." However, MICHAEL ANN is deeper in color tone, and does not stretch out its blooming like Friendship. An excellent shipper, we ourselves are using this variety for shipment to St. Paul to be shipped west on one of the railroads operating out of St. Paul to Seattle, for their dining car service.-Excellent propagator.

DOOT 261 (Mid-Season Bloomer)

DOOT is most commonly called a very pale lavender blending into pink and cream. A very beautiful variety. Opens 5-6 on a 20 bud spike, 36-40 in. overall height. Excellent substance, heavy ruffling and needle pointed petals. Like MILLBANK and MICHAEL ANN, DOOT is a very healthy variety. Is much better than most miniatures for bulblet production. In the 1961 Washington Gladiolus Show at Sumner, DOOT won a Blue in both the single and three spike open entries. Division Champ in both entries and took the award for Best R.I. in single spike open classes. What more could one ask for outside of Grand Champ? Showed the one and only first spike to bloom at the Washington 1962 Show and took a Blue, single spike, Division Champ, Best R.I. Miniature and Reserve Best Little Champion. Won a Blue, Red and White at Central International 1962, Wausau, Wisconsin. I never have found out what the wins were for. Show committees are very secretive after the shows are over.

L 75¢ ea., 10/6.00; M 50¢ ea., 10/4.00; S 35¢ ea., 10/2.80; Bulblets 100/\$6

Spikes of all three of the above varieties were shipped to Wausau via Air with only 1½ hours of water after being cut. Arrived in perfect condition. Looked like local grown spikes next day on show table, so committee man reported.

- THE CHAMP** One of the tallest and large flowered varieties which I have ever seen. I advise putting a stake in the ground before planting to keep the spike tied to when spike starts emerging from leaf, especially if weather is hot. A report from Schenectady for 1962 says, "Florets were 7 inches across and spike averaged 82 inches in height. They attracted a dozen or more strangers into my yard." Unless staked and it turns hot they will crook and crook bad. We have held up our planting of blooming size stock until after the 1st of June the past 3 years and have had no crooking, late September.

L 25¢ ea.

OLD SOUTH Smooth rose-smoky. Good all around habits. Old South is hard to beat. From what I have seen I would say the best miniature smoky.

L 2/35¢, 10/1.40; M 3/30¢, 10/80¢; S 10/60¢.

ORANGE MIDGET Glowing yellow with band of orange around each petal. Healthy tall grower.

L 2/30¢, 10/1.20; M 3/30¢, 10/80¢.

PARFAIT Medium salmon on edge of petals shading to cream-yellow throat. Quite a show variety.

L 2/35¢, 10/1.40; M 3/30¢, 10/1.00; S 10/60¢.

- PEDRO** This is a true miniature, should be classified in the 100 class. Nice whippy stem, florets are always perfectly faced, in the trials I saw this with 8 open. Medium-red with sharp blotches on light ground. Mr. Glines landed a good one here.
L 40¢ ea; M 30¢ ea.
- QUEST** Very heavy ruffled salmon pink with creamy throat. Grows a bit taller than the average miniature, very showy.
L 2/30¢, 10/1.20; M 3-30¢, 10/1.00; S 10/60¢.
- ROSY BELLE** Early, deep solid rose. One of the older, but still in demand miniatures.
L 2/30¢, 10/1.20; M 3/30¢, 10/80¢; S 10/60¢.
- TINY ROSE** Another of the older type but still in demand. Does not grow tall and keeps itself in the class of other true miniatures.
L 2-30¢, 10/1.20; M 3/30¢ 10/80¢; S 10/60¢.

If you are not familiar with the Miniature and Small varieties you have missed some of the most dainty blooms created. Especially those who go in for the arrangements. The miniature varieties have arrived at the stage now where the demand is exceeding the supply. Florida growers of Gladiolus cut flowers, where more Glads are grown than any other place in America are now growing Miniatures for their winter trade. Why not grow some of the small and miniature types for real pleasure from cut flowers?

For the many fine letters we receive each year from all over these United States I want to say, "Thank You." The many friendships we have built up over the past 35 years in the Gladiolus World can not be traded for any thing. At times we have made mistakes, but not intentional. Any mistakes relative to the handling of bulb orders have been rectified as soon as they were called to our attention.

All orders are acknowledged the day we receive them. If time lapses between the time we receive your order and the shipping time, which is common practice on orders received in the winter and being held until safe for shipping, you will be notified of the date order is shipped.

Don't send mail Special Delivery, we pick up mail as soon as it is distributed in the Post Office. Air mail from distance gets your order here much quicker. There will no doubt be a big shortage of bulbs on the Pacific Coast this season due to the Columbus Day blow and the terrible rains which followed it for weeks. So early orders may be of benefit to you. If dissatisfied, don't hesitate to write us. We do wish to make you Happy and Glad.
